

Please do not change the Indiana Telephone Privacy Law. We are very pleased with the protection it provides us. Our family time is limited and precious to us. No more calls during dinner, Saturday mornings, bedtimes, or our rare relaxing evening hours has been a wonderful thing. And no waste of time wading through voice mail messages to get to the important personal ones. We are intelligent and quite capable of contacting any business that we wish to have transactions with on our own. Television, radio, and mail provide sufficient information on any and all offers, opportunities , etc. that these businesses provide. Again please leave the Indiana Telephone Privacy Law as is. Thank you.
Audrey Traynham
